

During this time of global challenge, we at Parkway Plastic Surgery recognize the gravity and implications of the Covid19 pandemic and note that our response as individuals and organizations is going to influence both the duration and severity of this crisis. We are striving to be responsible stewards of our abilities while protecting and supporting our community as fully as possible.

We anticipate having altered office hours until April 30, 2020 and possibly beyond if recommended or deemed necessary.

Office hours: Tuesday and Thursday: 9:00 - 1:00

Limited appointments for evaluation of emergent and urgent concerns and care for possible surgical complications. Appointments will be spaced for social distancing and to avoid waiting.

Telephones will be answered during these hours every day for urgent concerns. Emergent assistance will be available 24 hours a day through the answering machine and individual discussions and telemedicine.

We wish to thank our first responders and those “in the trenches” caring for those currently ill and wish them health and success. We thank you as patients for your past and current support and look forward to the return of a more normal life and work style as this crisis resolves.

Sincerely,

Parkway Plastic Surgery
Dr. Steven M Nitsch and staff
